High comfort of motion

Easy opening is now combined with silent and effortless closing – AVENTOS HF makes each motion of the bi-fold lift system an emotional experience.

Perfect motion for the bi-fold lift

AVENTOS HF provides easy and comfortable opening due to the light operating forces required – even for wide and heavy bi-fold lift systems. The variable stop ensures that the front always remains in the desired position.

BLUMOTION provides silent and effortless closing action. The high-quality cover caps also ensure a sleek, modern and harmonious appearance on the inside of the cabinet.

Minimum number of parts – maximum number of applications

With the maximum of 3 lift mechanisms and 4 telescopic arms, AVENTOS HF covers all common cabinet widths and heights:

- For cabinet widths up to 1800 mm
- For cabinet heights from 480 to 1040 mm

i

Assembly and adjustment –
fast, easy and comfortable

Thanks to the CLIP mechanism, bi-fold lift system fronts can be quickly attached and removed.

Both top and bottom fronts can be adjusted in three dimensions, enabling fast and precise gap alignment.

The telescopic arm adjusts automatically to the cabinet height whilst maintaining the correct level of tension. It is attached to the lift mechanism using CLIP technology.

The opening force is adjustable, providing precise setting to suit the corresponding front weight.

For the AVENTOS HF bi-fold lift system, the cover cap is attached tool-free to the lift mechanism by simply pressing it on.
